Your New March of Dimes dollar is adding the fight to prevent crippling birth defects, arthritis and polio. These diseases affect the lives of one out of every four American families. It will help prevent crippling diseases.

PASTURE FERTILIZATION

Is it too expensive to fertilize pastures in Hancock County? The answer to this question depends on what you are going to do with the pastures.

If you are not going to use pastures to produce meat or milk for market it is too expensive to use fertilizer. But if you don't plan to sell anything from your

pastures, then it is too expensive to fertilize.

Remember this: Management must go with this investment in fertilizer if it is going to pay off.

It is too late now to file a tax return and get a social security credit for 1958. And in just a few months it will be too late to file one and get credit for 1959.

A farmer who reaches 65 years of age and wants to retire this year will need either four or five crop years to qualify for benefits.

File your report every year on time so your answer won't be "It's too late now."

They have authored a column in the NATIONAL PHOTOGRAPHER entitled "It's Your Business" and their studio has been featured two different times in EASTMAN'S STUDIO LIGHT magazine. At the annual convention of the PP OF A at Los Angeles in July 1959 they both received their degrees as Photographic Craftsman.

Featured speaker at the banquet on the evening of February 1, will be Mr. Riley Munday, Personal Director of MISERICORDIA FILE CO., of Cleveland, Mississippi. Mr. Munday is known over the Mid-South area for his homespun wit and philosophy in which he weaves the basic principles of human relations, everyone needs in conducting any kind of business.

An added feature of this year's program will be a print criticism period. All participants are invited to bring prints to this section during which the speakers and Masters of Photography who

are present will offer constructive criticism.

The Professional Photographers of Mississippi-Alabama, Inc., and the Professional Photographers of America, Inc., will, with the University of Mississippi, in a cordial invitation to all professional photographers to attend the conference and participate in all the activities of the meeting.

NOVEMBER EGG PRODUCTION GOOD

There were one-third more eggs produced on Mississippi farms during November than for the same month last year. The 10 million eggs produced were the highest on record for this month.

An increase in number of layers, 27 percent, and rate of lay, 4 per cent, were responsible for the record production. Number of layers on hand for November averaged 5,215,000, about 1.4 million higher than last year. Rate of lay for the month averaged 12.2 ggs per layer compared with 11.7 for November 1958.

TIME FOR CHECK UP ON FARM MACHINERY

Winter is a good time for Mississippi farmers to check their equipment and machinery for possible sources of danger before the spring planting and field work. A systematic inspection now can eliminate accidents and injuries later. Farm accidents can cause a great economic loss. This winter afford an excellent opportunity for farmers to completely inspect their working equipment to avoid delays, extra expense and inconvenience later when farmers can least afford them.
